

Atul Sagotra

Frontend Team Lead | Senior Frontend Engineer | AI Integration Pioneer

Brampton, ON (Toronto GTA) · Canadian Permanent Resident · atulsagotra774@gmail.com
[linkedin.com/in/atulsagotra](https://www.linkedin.com/in/atulsagotra) · github.com/atulsagotra · atulsagotra.vercel.app

PROFESSIONAL SUMMARY

Accomplished **Frontend Team Lead & Senior Software Engineer** with **7+ years of professional experience** architecting, building, and deploying high-performance, accessible enterprise web applications. A pioneer in **AI-augmented software development (AI-SDLC)**, designing and implementing workflows where Generative AI and LLM agents drive the entire lifecycle from planning and system design to automated testing and deployment. Deep expertise in **React, Next.js, TypeScript, and Node.js**, with a proven record of optimizing Core Web Vitals, building modular Micro-Frontend architectures, and establishing enterprise Design Systems. Skilled at leading cross-functional teams, mentoring developers, and translating complex product roadmaps into production-ready, clean code.

TECHNICAL SKILLS

AI & Agentic SDLC:	LLM APIs (Claude, Gemini), AI Planning & Prototyping, Auto Test Gen, CI/CD Log Analysis, Prompting	Languages:	JavaScript (ES6+), TypeScript, HTML5, CSS3/SASS, Node.js, SQL
Frontend Frameworks:	React.js (18/19), Next.js, Redux Toolkit, Zustand, React Query	UI & Design Systems:	Storybook, Styled Components, Tailwind CSS, Material UI, Lit, Web Components
Backend & APIs:	Node.js, Express.js, RESTful API, GraphQL, JWT, Firebase/Firestore	Testing & Quality:	Jest, Playwright, Cypress, React Testing Library, Automated QA (85%+ coverage)
Cloud & DevOps:	AWS, Docker, Kubernetes, Vercel, Netlify, CI/CD (GitHub Actions)	Architecture:	Micro-Frontends, Monorepo Management, System Design, Code Splitting, Bundle Optimization
Compliance & Perf:	WCAG 2.1/AODA Compliance, Core Web Vitals (LCP, INP, CLS), SEO	Process & Tools:	Agile/Scrum, Git, GitHub, Webpack, Vite, Jira, Figma, Mentorship

PROFESSIONAL EXPERIENCE

Charger Logistics <i>Team Lead (Frontend & AI Integrations)</i>	Brampton, ON Aug 2024 – Present
Led a cross-functional engineering team, introducing an AI-first engineering culture that leveraged LLMs to accelerate planning, code generation, and deployment. Architected a custom AI-driven development pipeline using Claude & Gemini APIs to automate technical spec drafting, user story breakdown, and test case planning — reducing planning-to-dev cycles by 35%. Spearheaded automated test generation and CI/CD validation using AI agents, automatically writing Jest/Playwright tests for new components and analyzing build logs for instant error resolution, maintaining 85%+ test coverage. Designed high-performance, real-time dashboards using React, Zustand, and Firestore for real-time data synchronization across 500+ concurrent users. Optimized data-fetching with React Query, reducing API calls by 40% and improving interaction response times on complex logistics tracking views.	
Srijan (A Material+ Company) <i>Senior Software Developer & Tech Lead</i>	Delhi NCR, India Feb 2023 – July 2024
Led frontend architecture for enterprise clients using React, Next.js (App Router), and TypeScript in cloud-native environments serving 100K+ monthly active users. Pioneered AI-assisted code generation and refactoring workflows, utilizing AI tools to accelerate legacy migrations and clean up codebases, boosting developer efficiency by 30%. Achieved 35% reduction in page load times through dynamic lazy loading, route-based code splitting, image optimization, and edge caching — measurably improving Core Web Vitals. Designed a shared Design System and component library (50+ components) with Storybook, reducing frontend development cycles by 30%.	
Pasarpolis <i>Lead Front-end Engineer (B2C)</i>	Delhi NCR, India Feb 2022 – Feb 2023
Led frontend development for "TapInsure", a high-traffic fintech/insurance platform — delivered 70% of production codebase within 3 months using React, Next.js, and WebView integrations. Utilized early-stage AI tools to optimize boilerplate writing, allowing the team to deliver features ahead of schedule. Designed Micro-Frontend architecture with independently deployable components, reducing core UI development effort by 40%. Maintained 99.9% uptime for checkout funnels via automated testing (Jest + Cypress E2E) with 90%+ coverage.	

- **Built responsive UIs** with React.js for enterprise financial clients (NASDAQ Nordic), serving as the primary frontend technical lead during Agile sprints.
- **Developed Micro-Frontend modules and Web Components** using Lit, enabling seamless integration between legacy systems and modern React applications.

SELECTED PROJECTS

AI-Augmented Logistics Dashboard — Charger Logistics

React, Zustand, Firestore, Claude/Gemini APIs, GitHub Actions

Built real-time logistics dashboards featuring AI-assisted telemetry analysis, automated anomaly explanations, and LLM-driven planning assistants for dispatchers.

TapInsure — B2C Insurance Platform — Pasarpolis

Next.js, React, Styled Components, Micro-Frontends, Jest, Cypress

Led end-to-end development of a mobile-first insurance application processing 10K+ daily transactions, featuring dynamic theming, micro-frontend architecture, and 99.9% uptime.

EDUCATION

Post Graduate Diploma in Business Management (IT & Systems)

NMIMS University, Mumbai, India | Jan 2021 – Dec 2024

Bachelor of Technology in Computer Science & Engineering

Chandigarh Group of Colleges, Mohali, India | Aug 2016 – Apr 2020

CGPA: 7.99/10 | PMSSS Scholar | Tech Fest Coordinator

ACHIEVEMENTS

- **Best Idea Solution Award** — Designed a shared micro-frontend UI layer, eliminating duplicate development effort across engineering teams.
- **Best Team Contributor Award (Pasarpolis, 2022)** — Recognized for outstanding cross-team collaboration and on-time product delivery.
- **Smart India Hackathon Finalist & Team Lead** — Led a team solving real-world industrial optimization problems (Govt. of India initiative).
